

## Letter of Invitation

Dear Mr. Andras Roka

First of all, I would like to wish you all the very best with your illuminating science teaching and very interesting chemistry performances.

I am the representative of Science on Stage Turkey. I had the chance of visiting your stand and watch your magnificent stage performance on chemical experiments (Time Travel as a Guided Chemistry Tour) at Science on Stage Europe Festival 2015. I am also related to chemistry since I am a chemical engineer and chemistry & natural science teacher for years.

We are going to organise Science on Stage Turkey Festival on 7th of May, Saturday, 2016 at Nazım Hikmet Congress and Arts Centre in Ankara, Turkey. You can reach the news of this event on Science on Stage Europe page.

As Science on Stage Turkey National Steering Committee, we would like to invite you for Turkish Science on Stage Festival. Many teachers from all over Turkey will be very pleased to watch your chemistry stage performance and visit your stand at this event. If you accept to come, we will add your name as Guest Teachers Andras Roka from Hungary and Kirsi Rehunen from Finland in our announcements to public and press. All the arrangements for Kirsi Rehunen has already been finished.

Your travel costs (both flight tickets for your arrival in Turkey and departure from Turkey) will be paid by Yenimahalle Municipality in Ankara, who is hosting the whole event, and also you will be accommodated in Municipality Guest House and your meals will be provided in there.

We would kindly ask you to let us know about your plan if you accept to come. Please do not hesitate in asking any question in your mind regarding your participation to Science on Stage Turkey Festival.

Thank you very much indeed for your interest in advance.

Looking forward to your answer

Best Regards

Nilgün ERENTAY  
Chair, Science on Stage Turkey NSC
